

AMERICAN CAR CRAFT INSTRUCTIONS

CAMARO STAINLESS STEEL ROTOR HUB COVERS ***PART #102033 Smooth***

Parts Included:

4-Stainless Hub Covers

Introduction:

These stainless steel rotor hub covers are the perfect choice to hide the unsightly and perhaps rusty hub visible just behind the wheels of the Gen 5 Camaro. They have been especially designed to fit perfectly inside the BREMBO brake caliper closing the visible space between the caliper and wheel hub, they are available with a smooth polished finish or a simulated drilled rotor look. A must for all custom wheels applied to the Camaro as well as the stock wheel. Hand polished to perfection a truly custom accessory for that discriminating customizer that can appreciate the attention to detail.

Liner Information: Your new accessories will come to you with a protective surface liner. Leave this liner in place until the installation is complete to prevent finger prints and or possible scratches during installation.

1. To install these hub covers simply remove the Camaro's wheels place the covers over the wheel bolt studs and reinstall the wheels. Be sure to torque the wheels back to the factory specs.

If you have any questions during installation please call American Car Craft at 727-861-1500.

Thank you and enjoy your purchase!
